

**Mission: Hospice Toronto enables access to appropriate care and support for people with serious illness and their caregivers when and where they need it, whoever they are. We achieve this through our culture of caring and discovery, which is fueled by:** Passionate, dedicated volunteers – Imaginative partnerships – Focus on research and innovation

Hospice Toronto refers to the incorporated not-for-profit entity of Hospice Toronto, and to the collection of its staff, volunteers, and its assets. Hospice Toronto is the first volunteer and community-based, not for profit, in-home hospice palliative care program. We work on a care team model, in the belief that teams of caregivers from different walks of life can best meet the needs of someone who chooses to die at home.

A care team often includes spouses or partners, families, friends, neighbors, colleagues, doctors, nurses, personal support workers, and volunteers. We can help set up the team, provide team members with training and support, and supplement the team with skilled volunteers if required.

Part of Hospice Toronto's supports include the Young Carers Program (YCP). YCP supports children and youth aged 5-18 across the Greater Toronto Area who care for a family with a life-limiting or chronic illness, a disability, an addiction or mental health concern or a language barrier. YCP offers a variety of free recreation and therapeutic peer support programs, with a focus on being a Young Carer. YCP provides social, recreational, educational, and skill development opportunities for Young Carers by connecting them with peers, building resilience and self-esteem, and providing a pace to take a break and have fun.
